

DIAMOND VANTAGE

PRODUCT CATALOG | 14TH EDITION

DIAMOND VANTAGE

Since 2003, Diamond Vantage has been serving the construction and stone industries with diamond tools that yield the highest level of performance. From its inception, Diamond Vantage has been working to become the BEST supplier to our customer by continuing to upgrade in all areas of our product line and customer services.

We have our most exciting product lineup to date, and have included all our new products in this beautiful catalog. We have made great strides to make the catalog more useful than ever. Grades, bonds, and other specifications are all clearly presented for each product.

Diamond Vantage diamond tools are used in all areas, from highways to bridges to buildings, and everywhere in-between. We continue to strive towards becoming the leader in diamond tool manufacturing by providing our customers with the BEST quality and service, exceeding industry expectations. Diamond Vantage manufactures a complete range of construction diamond tools designed for maximum performance. Such products include: flat saw blades, wall saw blades, hand saw blades, small diameter blades, diamond wire, cup wheels, core bits, specialty products and much more!

TRUTH IN ENGINEERING

What sets Diamond Vantage apart from most of its competition is that we are a true manufacturer. Unlike most of our competition, we manufacture 100% of the diamond tools we sell.

- The result is quality, consistency, innovation, and competitive pricing.
- Experienced product engineers for technical support and problem solving.
- Manufacture a full range of diamond tools.
- Engineered to reduce customer operating costs.

TRUTH IN MARKETING

- Extensive national sales & marketing support.
- Complete sales support and training.

TRUTH IN SOLUTIONS

- Large inventory for quick turnaround.
- Private label & co-branding.
- Incentive programs tailored to meet each customer's request and needs.

TRUTH IN VALUE

- Industry leader in innovation.
- Lowest standard pricing in the industry.

BRANDS WE OFFER / 004
ZENESIS™, DiamondX®, Equipment

HOW DIAMOND BLADES WORK / 005

CHOOSE FROM THOUSANDS OF SPECS / 006

UNDERSTANDING THE AGGREGATES / 007

CHOOSING THE PROPER BLADE SEGMENTS / 008

TROUBLE SHOOTING, POLICIES, TERMS/CONDITIONS & WARRANTY / 107

PROMOTION ITEMS / 112
DV Display Rack, DV Water Bottle, DV Hat, DV Safety Shirt, DV Counter Mat, DV Pen & Note Pad

PROFESSIONAL SERIES / 009 (35-120 HP)
Flat Saw Blades & Wall Saw Blades for Concrete, Asphalt and Asphalt Overlay

SPECIALTY PRODUCTS / 020
Pavement Grinding, Diamond Wire, Ring Saw Blades, All-Cut Blades, Ductile Iron Blades

CORE DRILLING / 025
Wet & Dry Bits for Concrete, Masonry, General Purpose and Asphalt, Extensions, Adapters

EARLY ENTRY, GREEN CONCRETE / 031
Green Concrete Blades, Shields and Skid Plates

HIGH SPEED • MASONRY LOW HP FLAT SAW BLADES / 036
For Hard Materials, General Purpose, Concrete, Asphalt, Abrasive Materials and All-Purpose

SURFACE PREP, F.A.S.T. & CONCRETE POLISHING PRODUCTS / 049
Cup Wheels, Grinding Blocks, Grinding Wheels, Grinding Heads, F.A.S.T. System, Polishing Pads

SMALL DIAMETER / 059
For Hard Materials, General Purpose, Abrasive Materials and All-Cut

TUCK POINT • CRACK CHASER / 067

Standard, Double & Triple
Tuck Point Blades; V-Shaped and Turbo Crack Chasers

TILE BLADES / 071

For Ceramic, Porcelain (Wet & Dry), Glass, General Purpose & Core Bits

STONE PRODUCTS / 078

Turbo Rim Blades, Polishing Pads, Cup Wheels, Core/Finger Bits, Pin Drills,
Shaping Tools, Bridge Saw Blades, Cutter Grinder, Profile Wheel, Diamond Hand Pad

METAL CUTTING / 093

Chopper, Cutter (Type 1), Depressed Center (Type 29), Pipeline Disc (Type 27),
Foundry Disc, Cutting Grinding Wheel, Hard Facing Welding

EQUIPMENT / 099

Low HP Saws (FS200-13H), Masonry Saws (MDE350), Core Drills (SMD08, SMD12,
DRE4, DRE4 Stand), Concrete Grinding (FG7500, FG5000, DC3300, DC350LM,
EG1000, DV Hand Grinder)

*** DESCRIPTION OF ICONS**

 angle grinder (small)	 angle grinder (large)	 bridge saw	 CNC machine	 circular saw	 core rig
 high hp walk-behind	 low hp walk-behind	 high speed saw	 masonry saw	 ring saw	 tile saw
 wall saw	 wet use	 dry use	 made in USA		

ZENESIS™ TECHNOLOGY

WORLD'S MOST ADVANCED PATTERNED DIAMOND TECHNOLOGY GETS EVEN BETTER.

- Hybrid Layering Technology maximizes exposed diamonds.
- Maximizes product consistency.
- Significantly improves both cutting speed and blade life.
- Enables cost-effective mass production.
- Protected by patented technologies.

DIAMOND-X

NEW DIAMOND TOOLS FOR DEMANDING METAL-WORKING APPLICATIONS

DiamondX® is a new generation of tools for the metal-working industry. DiamondX® concentrates a large number of diamond grits on a single layer with an incredibly strong bond. This technology allows DiamondX® to cut and grind materials that traditional diamond tools could not.

Applications:

- High & Low Carbon Steel
- Hard Facing Alloys
- Ductile Iron
- Rail Track
- Steel Section, Bar & Tube
- Wood, Plastic, FRP, PVC

DIAMOND VANTAGE EQUIPMENT

Hakken

solo

Diamond blades contain industrial-grade diamonds embedded in segments or rims on their cutting edge. As the blade is used, the abrasive qualities of the material being cut (such as concrete) wears down the segment. Diamond crystals either get crushed or let loose as the metal matrix gets worn away, exposing new diamonds to continue the cutting.

The abrasive quality of the material being cut is a large factor in choosing the correct blade for a job. Harder materials, such as cured concrete, require a blade with a softer metal mix. This softer mix will ensure adequate erosion of the segment bringing new diamond to the surface at the optimum rate.

Soft materials such as green concrete and asphalt tend to wear down segments faster. Therefore, segments with a harder, more wear-resistant metal mix in the segment, provide longer blade life and overall better performance.

Abrasive materials tend to erode the metal core, or center, of diamond blades causing undercutting. Undercutting is usually concentrated on part of the core that attaches to the segment. If undercutting is excessive, it can cause segment loss and damage the blade. Diamond Vantage offers 3 types of undercut protection which reduce abrasive slurry accumulation beneath the segments to provide extended blade life.

Segments come in different heights. The total segment height is not as important as the diamond depth – the portion of the segment that contains diamonds. The diamond depth combined with diamond concentration and quality determines the overall performance value of the blade.

The accompanying chart shows the effect different variables have on a diamond blade cutting speed and blade life.

WHAT TO CONSIDER AND WHEN CHOOSING A DIAMOND BLADE

WHAT IS THE MATERIAL?

Brick?
Block?
Combination of Brick and Block?
Green Concrete?
Cured Concrete?
Asphalt?

WHAT IS THE CUTTING METHOD?

Wet or Dry?

WHAT KIND OF EQUIPMENT IS BEING USED?

High speed hand held saw?
Masonry table type saw?
Walk behind saw? (low or high hp)
Hand held power tool?

HOW DEEP IS THE CUT?

Use proper blade diameter for depth required.
(remember, a 5" cut requires a 14" blade.)

HOW BIG IS THE JOB?

Higher quality blades are more economical to use.

DIAMOND BLADE CUTTING PERFORMANCE VARIABLES

Variables	Change	Result	
		Cutting Speed	Blade Life
Segment Bond Hardness	Harder	Slower	Longer
	Softer	Faster	Shorter
Segment Width	Thinner	Faster	Shorter
	Thicker	Slower	Longer
Material Hardness	Harder	Slower	Longer
	Softer	Faster	Shorter
Material Abrasiveness	More	Faster	Shorter
	Less	Slower	Longer
Material Steel Reinforcing	Less	Faster	Longer
	More	Slower	Shorter
Material Aggregate Size	Smaller	Faster	Shorter
	Larger	Slower	Longer
Horsepower	Lower	Slower	Longer
	Higher	Faster	Shorter
Blade Speed RPM	Lower	Faster	Shorter
	Higher	Slower	Longer
Water Volume	Lower	Faster	Shorter
	Higher	Slower	Longer
Cutting Pressure	Lower	Slower	Shorter
	Higher	Faster	Longer
Cutting Depth	Shallow	Faster	Longer
	Deep	Slower	Shorter

DIAMOND BLADE CUTTING DEPTH AND SPEED

The actual cutting depth may vary depending on a number of factors, including the exact blade diameter, the exact flange diameter, saw components, etc.

Warning: Operating at greater than the max RPM can cause blade damage, which may cause injury.

Blade Size (in.)	Cutting Depth by Application (in.)					Speed	
	Flat Saw	Wall Saw	Masonry	High Speed	Tile	Rec. RPM	Max. RPM

DIAMOND BLADE SEGMENT/RIM SAMPLE CHART

Diamond blades come in many different segment and rim configurations. This chart may help to show the various types of products available and to simplify, for the user, the selection of what will best serve the desired application. The actual application will determine the final product specification, shape, and size.

PROFESSIONAL BLADES PERFORMANCE CHART

ZENESIS™ V SERIES

35 con • concrete

- Features ZENESIS™, the most advanced diamond pattern for fast cutting through hard, reinforced concrete and long blade life.
- All-new 12mm segments are tuned for aggressive performance in hard aggregates
- Ideal for medium to high horsepower flat saws.

ZENESIS™ V+ SERIES

35 con • concrete

- Features ZENESIS™, the most advanced diamond pattern for fast cutting through hard, reinforced concrete and long blade life.
- All-new 15mm are tuned for the fastest, most aggressive cutting in medium to hard aggregates and longer blade life.
- Ideal for high horsepower flat saws.

ZENESIS™ V2 SERIES

40 & 50 con • concrete

- The new ZENESIS™ V2 series features a triangular structure and multi-diamond layers to control the exact time of diamond exposure, as well as the number of diamonds on the cut for uniform wear and optimum sawing performance. Field-test results have confirmed high cutting speed and long tool life on heavily reinforced concrete as well as overlay and other materials. A large selection of bond hardness and diamond concentrations are available to cover the majority of applications.

BOND SELECTION CHART (ASPHALT)

X1000
asphalt

STANDARD BLADE

- 10mm (.394") segment height
- Most economical version of our professional series asphalt blades (not for machines over 65HP)

X2000
asphalt

HEAVY DUTY BLADE

- 10mm (.394") segment height
- Balance between cost and performance (not for machines over 65HP)

X4000
asphalt

SUPREME BLADE

- 10mm (.394") segment height
- Utilizes our highest quality diamond for maximum performance in cutting asphalt
- Highly recommended for machines 65HP and larger
- Offers user the lowest cost per cut

wall saw

ZENESIS™ V SERIES
wall saw

STANDARD PLUS BLADE

- 10mm (.394") segment height
- Our most economical wall saw blade
- For air or hydraulic saws
- Available in 3 bonds

ZENESIS™ BLADE

- Features ZENESIS™, the most advanced diamond pattern for fast cutting through hard, reinforced concrete and long blade life.
- All-New 12mm Segments
- Laser welded

SPECIALTY PRODUCTS

PAVEMENT GRINDING

Diamond Vantage offers blades for removing layers of concrete or asphalt. These blades are stacked together with spacers between the blades. This offers incredibly efficient removal of any unwanted pavement.

Grinding can solve many irregularities in the pavement, including:

- Faulting at joints or cracks
- Roughness
- Wheel ruts in older concrete
- High noise levels
- Warping caused by moisture

Our grinding blades are available with ZENESIS™ Technology 2.0, the world's most advanced pattern technology, which ensures smooth consistent grinds and long blade life.

X100
wire brush

SUPREME BLADE

- Designed to use on low horsepower flat saws (5 to 20 hp)
- Oil tempered crimped steel wire with a 3/8" face width
- Low fill density wire brush offers great flexibility, providing efficient cleaning
- High fill density wire brush is good for finer finishes and fast cleaning
- Max. RPM : 4,500 rpm for 12" wire brush

Application(s)

- For joint or crack cleaning in concrete or asphalt

24 | * While the blade can be used to occasionally cut steel, it was not designed for heavy steel cutting applications. For demanding metal-working applications, please refer to DiamondX® (p139) products. While adapters permit any blade to be used on various manufacturers' saws, certain manufacturers recommend against using particular type of blades on their machines. As such, customers are requested to check suitability of all blades before purchase and use on any given saw and/or machinery.
* CERTAIN MANUFACTURERS OF POWERED SAWS, INCLUDING STIHL® AND HUSQVARNA®, PROHIBIT USE OF ABRASION SIDE COATED BLADES ON THEIR SAWS.
STIHL® is a trademark of Andreas Stihl AG & Co. HUSQVARNA® is a trademark of Husqvarna AB

A close-up photograph of a metal core drill bit. The bit is positioned diagonally across the frame, with its cutting edge on the right. The background is a vibrant blue with abstract, overlapping circular shapes. The lighting highlights the metallic texture and the sharp edges of the drill bit.

POLISHING PADS

- Velcro for easy attachment / detachment, no tools required.
- 30 grit to 3000 grit.
- Simple to use and light weight.
- Great for smaller jobs or tight places where larger machines are not practical.
- Basements, second stories or anywhere you can't get a large machine.
- Get professional results with a lighter machine.
- Great for beginners or rental companies.
- Large heavy concrete polishing machines can achieve an 80° reading on a gloss meter. Wing pads can achieve this same level of shine.
- Designed for use with 17" floor sanders. 17" discs also available

F.A.S.T. SYSTEM

concrete polishing diamonds

Not just another concrete polishing system Our Proprietary F.A.S.T. (Flexible Angle Segment Technology) System makes changing segments fast and easy. It is the only system with user selectable segment angle. With each segment angle producing different grinding speed and surface finish, user can select the best segment angle for the job.

SEGMENT CONFIGURATIONS

HORIZONTAL

Aggressiveness: ●●●●●
 Scratch Pattern: rough scratch pattern
Ideal for grinding down or surface re-coating

SLANT

Aggressiveness: ●●●●○
 Scratch Pattern: shallow, smooth scratch pattern
Ideal for preparing floor for polishing/finishing

COMBINATION: VERTICAL & SLANT

Aggressiveness: ●●●○●
 Scratch Pattern: shallowest & smoothest scratch pattern
Delivers best surface finish while maintaining aggressive grinding speed

VERTICAL

Aggressiveness: ●○○○○
 Scratch Pattern: shallowest & smoothest scratch pattern
Ideal for showroom and other high-end applications

GRINDING WHEELS

GRINDING EDGE WHEEL

Fast Edge is a revolutionary design that improves the quality of edge work while reducing the scratches and gouging that metal bond cup wheels can cause. The Fast Edge system will eliminate metal bond cup wheels on most concrete polishing projects. Fast Edge is fast, light weight and easy to use resulting in a superior edge.

Fast Edge Ceramic Cup wheels can run on most hand grinders and walk behind edge machines that use a 5" or 7" wheel with 5/8"-11 threaded connection. Please review maximum operating speed marked on our wheel and compare it to your grinder's rpm. Do not exceed the maximum operating speed of the wheel.

ZENESIS™ GLASS
glass (wet)

ZENESIS™ BLADE

- Unique slot and rim design give the **ZENESIS™ Continuous Rim Blade** unparalleled cutting precision and performance, all without breaking a sweat. And since the blade incorporates ZENESIS™ pattern technology, fabricators can count on exceptionally smooth, chip-free cutting of porcelain tile, granite and other hard materials.
- Pool Tile, Large Format Porcelain, Porcelain Pavers, Stone
- Use 4", 4.5", 5" and 6" wet or dry. All other sizes must be used wet.
- **Do not use for radius cutting.**

PREMIUM BLADE

- 8mm (.315") continuous rim height
- High concentration of fine, top quality diamonds give the smoothest cut of any blade we offer. Badly chipped glass tiles are never acceptable. The solution is here.
- **Wet cut only.**
- **Do not use for radius cutting.**

Application(s)

- Glass Tile, Glass Block, Soft Brittle Marble

PREMIUM BLADE

- The new **ZENESIS™ GLASS** Tile Blades provide chip-free performance significantly beyond anything currently available on the market. Independent testing has shown this blade to provide superior performance on all types and thicknesses of glass.
- Also provides smooth clean cuts on hard porcelain
- 7.5mm segment height for long life
- **Wet cut only.**
- **Do not use for radius cutting.**

Application(s)

- Glass Tile, Glass Block, Soft Brittle Marble

- Pattern diamond technology guarantee maximum performance start to finish
- 20mm (.787) segment height
- Silent core for indoor use
- Proprietary recipe bond that cuts the hardest natural stone, including quartzite, and engineered stone effortlessly
- Excellent miter cutting blade
- Slanted gullets draw in more water to keep blade running cooler

Application(s)

- Granite, Quartzite, Engineered Stone

X300-10MM
bridge saw blades 

PREMIUM BLADE

- 10mm (.394") segment height - have less chance of "flexing" while miter cutting
- Silent core for indoor use
- Clean Cutting
- Smaller diamond particulate gives blade perfect chip free cuts in soft materials like marble and limestone
- Highest diamond concentrate of all our bridge saw blades

Application(s)

- Marble

THIN VENEER
large diameter blade

The large diameter blades for thin veneer stone from Diamond Vantage are designed to fit the thin veneer saws. The tall 20mm segments ensure consistent performance and long blade life, increasing your productivity by reducing machine downtime.

- Additional sizes/arbor available upon request.
- Custom Arbor for Park Industries TXS Series*
- Different bonds available for different types of stone

Application(s)

- Thin Veneer

ZENESIS™ CORE BITS
segmented

PREMIUM BIT

ZENESIS™ DRY CORE BIT is thoroughly engineered to achieve superior wet and dry coring of granite and engineered stone. Laser-welded segments, enlarged cooling holes, and generous side coating result in faster cleaner cuts without even breaking a sweat.

- Available with 5/8-11 threads
- All-new design for enhanced performance
- Laser-welded segments for safer coring
- Larger cooling holes on the barrel
- Abrasive side coating to reduce friction
- Designed for granite and engineered stone
- Can be used wet or dry

ROUTER BIT

general purpose (wet/dry)

PREMIUM BIT

Grinder router bits have a female 5/8" arbor that threads onto any grinder to profile marble, porcelain, block and granite. Each bit has 2 independent steel (not plastic) bearings so they can be run wet or dry. The shaping is done with high quality, large particulate diamonds that are brazed to the body of the bit. Top quality components equal top quality performance!

PREMIUM BLADE

The best and fastest way to bevel or bullnose tile is with our 6" tile saw wheels. This is a professional grade, production tool that can shape marble, ceramic, granite and even the hardest porcelain tiles. Not to be confused with other brands that use electroplated or brazed diamonds, our blades have a metal bond with multiple layers of diamond to outlast all others.

PREMIUM WET PADS

wet polishing pads

PREMIUM PADS

- Wet polishing pads, beehive type
- Designed for the fabricator who demands the best quality
- Unique honeycomb segments for the best water displacement while polishing
- Highest gloss finish
- 3mm thick pad for long life
- Available in 4 and 5" diameter

Application(s)

- All Natural Stone

HYBRID 3 STEP DRY PADS
dry polishing pads

PREMIUM PADS

- Replacing 7-step polishing with only 3 pads
- #1 pad sand the material, removing saw and grinding marks. Perfect for tumbled travertine.
- #2 pad hones the material giving it a semi-gloss look and super smooth finish.
- # 3 pad polishes the material giving it a full gloss shine quickly.
- Great for backsplashes and sink openings.
- Amazing for giving porcelain a finished edge detail.

Application(s)

- All Natural Stone

SHAPING TOOLS

PREMIUM SHAPING TOOL

- Shank size: 5.95mm diameter, 45mm length
- Designed to be used where diamond blades and cup wheels can't
- 1/4" shank to fit any tool with 1/4" collet like die grinders and trim routers
- Extremely popular with stone sculptors

Application(s)

- Different shapes available for natural stones and concrete.

METAL CUTTING PRODUCTS

HIGH PERFORMANCE AND COST EFFICIENCY :

LONG TOOL LIFE AND LESS DOWN TIME

DiamondX[®] saves you money by providing extended tool life as well as dramatically reducing downtime caused by changing out worn abrasives.

SAFETY :

REDUCED VIBRATION AND LESS WHEEL BREAKAGE

Traditional bonded abrasives are susceptible to fracture and breakage. If this occurs, it can cause injury and becomes a serious safety concern. DiamondX[®] improved technology of brazing diamond grits to the surface of a solid steel body greatly reduces the risk of fracture and breakage.

WHEEL WEAR :

RETAINS TOOL SIZE AND SHAPE

The disadvantages of traditional bonded abrasives are short tool life and continuously changing tool size and shape during usage. DiamondX[®] offers extended tool life, and its size and shape does not change throughout its tool life.

APPLICATION :

VARIETY AND VERSATILITY

DiamondX[®] offers a wide variety of tools for cutting, grinding, weld joint removal, forming, and surface prep work. And because DiamondX[®] tools are exceptionally versatile, they can be used on ferrous and non-ferrous metals as well as ceramics and polymers.

ENVIRONMENTALLY AND OPERATOR FRIENDLY :

REDUCED SPARKS, LESS DEBRIS AND MINIMAL ODOR

Traditional abrasives produce a high volume of sparks and odor as well as debris as the abrasives wear down. With DiamondX[®], sparks are greatly reduced, odor is minimal, and the only debris remaining is from the material being worked.

Reduced Sparks

Less Debris

CHOPPER
DIAMOND[®]X

The all-new **Diamond[®]X Chopper** is a metal cutting chop saw blade. Designed for use on low-powered metal cutting chop saws, the 14" **Diamond[®]X Chopper** will chop through steel, stainless steel, rebar, structural steel and bolts with ease. The 14" **Diamond[®]X Chopper** will make more cuts than up to 70 conventional abrasive wheels*, greatly increasing the productivity by reducing the downtime associated with changing out worn abrasives. Like all **Diamond[®]X** products, the new 14" **Diamond[®]X Chopper** is much safer and more eco-friendly than abrasives. The tools are made of steel and diamonds, which retain their shape, cut after cut. The steel core is virtually indestructible, providing a much safer working environment when compared to conventional abrasives that can fracture & break. Sparks, odor and debris are all greatly reduced, improving working conditions for the operator.

*1 14" **Diamond[®]X Chopper** will outlast up to 70 14" abrasive discs. Results may vary depending on the application, machine, and operator.

Applications

Steel, Stainless Steel, Rebar, Studs, Bolts, Pipe, Sectional Tubing & More!

CUTTER
DIAMOND[®]X

The all-new 14" **Diamond[®]X Cutter** is the most advanced, versatile and powerful Diamond[®] blade we've ever created. We've made advancements to our brazing technology to increase the speed and longevity of the blade. The higher quality diamonds are bonded to the steel core with a level of precision that is simply unmatched in the industry. Designed for use on high speed gasoline cutoff saws and higher-powered chop saws, the 14" **Diamond[®]X Cutter** will slice through steel, stainless steel, rebar, structural steel and bolts with ease. The 14" **Diamond[®]X Cutter** will make more cuts than up to 70 conventional abrasive wheels*, greatly increasing the productivity by reducing the downtime associated with changing out worn abrasives. Like all **Diamond[®]X** products, the new 14" **Diamond[®]X Cutter** is much safer and more eco-friendly than abrasives. The tools are made of steel and diamonds, which retain their shape, cut after cut. The steel core is virtually indestructible, providing a much safer working environment when compared to conventional abrasives that can fracture & break. Sparks, odor and debris are all greatly reduced, improving working conditions for the operator.

For use only on a high speed gas saw

EQUIPMENT

FS200-13G
flat saw

Diamond Vantage Walk Behind Saws are built from the ground up to provide years of reliable cutting. These saws will cut concrete and asphalt with little to no vibration because of their heavy-gauge steel frames, rugged shafts and bearing assemblies.

- Precision machined arbor shafts
- Multiple-belt power transfer system
- Superior rigidity for smooth, clean, straight cuts
- Heavy-Duty 7-gauge steel construction
- Large screw-type depth control locks for consistent cutting depth
- **Part #: FS200-13G**

Blade Capacity	18"
Weight	254 lbs
Horse Power	13 HP
Dimensions	49" L x 27" W x 40" H
Max Cut Depth	6-3/4"
Motor	Honda

MDE350
masonry saw

The MDE350 Dry Masonry Saw features a powerful 3HP motor and 14" blade capacity for fast cutting of brick/block and general purpose applications. The saw can also be used wet with our optional wet kit. The powerful dust collector kit ensures clean cutting, indoors or out.

- **Part #: MDE350**
- **Stand Part #: MDE350-ST**

Blade Capacity	14"
Weight	75 lbs.
Horse Power	3HP
Arbor Size	1"
RPM	3,600
Max Cut Depth	5"
Rip Cutting	16"
Thermal Protection	Equipped
Motor	115V/60Hz

HGS-14S
gas saw

HGS-14SI
gas saw

SOLO® cut-off saws effortlessly cut their way through concrete, steel, asphalt, cast iron or stone. They also set a new benchmark because ergonomic features, technical details and the ease of maintenance are quite unique in this engine class. At the core of all SOLO® Cut-off saws is the modern 81 cc high performance two-stroke engine, developed and manufactured by SOLO® in Sindelfingen, Germany. The power rating of 5.44 HP is more than sufficient to cut the hardest materials. Amazingly, this engine produces very low emissions despite its high performance.

- Ergonomic advantages: optimum weight distribution, compact design, anti-vibration system with steel springs, rubber covered handles, tank caps with protection against over-tightening.
- Electronic ignition system with auto choke.
- Equipped for wet cutting with water hose adapter to connect the optional Pressurized Water Trolley (part # 8000150) or optional Heavy-Duty Pressurized Water Tank (part # 8900850).
- Decompression valve for easier cold starts.
- **Part #: HGS-14S**

- World's first Intelligent Lubrication system (iLube®). Oil is metered to the fuel by an electronically-controlled pump (881).
- Ergonomic advantages: optimum weight distribution, compact design, anti-vibration system with steel springs, rubber covered handles, tank caps with protection against over-tightening (green: oil tank on model 881).
- Electronic ignition system with auto choke.
- Equipped for wet cutting with water hose adapter to connect the optional Pressurized Water Trolley (part # 8000150) or optional Heavy-Duty Pressurized Water Tank (part # 8900850).
- Decompression valve for easier cold starts.
- **Part #: HGS-14SI**

SMD08
core drill

- Motor comes with slip clutch that can be easily adjusted from outside the motor and can be completed on the job site
- Max core bit length of 21" can be installed
- Feed handle can be placed on either right or left side of carriage for easy drilling close to walls and columns
- 4 adjustable leveling screws for drilling uneven surfaces
- Double insulated construction
- Swiveling water valve can be rotated full 360 degrees for added convenience
- Engineered for both vertical & horizontal drilling
- Total weight: 71 lbs. (32.2 kg)
- One-year limited warranty
- Manufactured by Hakken for Diamond Vantage
- **Part #: SMD08-V3**

Optional Items:

- 6" and 12" water collecting ring
- Vacuum Pump, Vacuum Pad, Ceiling Jack

Power	115V, 15A drill motor
Core Bit Capacity	8"
Spindle Thread	1-1/4"-7
Column Thickness	1-15/16"
Stand Height	31-7/8"
Carriage Travel	19-7/8"
Anchor Base	7" W x 8-1/2" L
Clutch Type	Slip
Speed	700 RPM (Single)
Weight	49 lbs (22.2 kg)

Hakken® drill stands
& dustless connector

standard stand *standard stand with large vacuum base*

swivel stand

angled stand

*DUSTLESS Connector
also available for all sizes*

DRE4
core drill

- 3 speed 19.5 AMP hand-held core drill
- Wet or dry diamond core drill
- Water swivel and extraction port built into the spindle
- Quick Change mount quickly switches from hand-held to stand-mounted drilling
- Drill stand adjustable up to 45 degrees
- Includes drill bit connections 5/8"-11 UNC and 1-1/4"-7 UNC
- **Part #: DRE4**

EIBENSTOCK

Power	19.5AMP/110V
Max Drilling Diameter	6"
Load Speed	
1. Gear 3/4" - 6 3/8"	0-510 RPM
2. Gear 1 3/4" - 3 1/4"	0-1150 RPM
3. Gear 1/2" - 1 1/4"	0-2500 RPM
Spindle Connection	5/8" x 11 UNC & 1 1/4" x 7UNC
Collar Diameter	60mm
Carrying Case Included	yes
Weight	15 lbs

HAND-HELD CORE DRILL

DRE4S
core drill stand

- Lightweight, robust drill stand
- Available vacuum base (Model DRE4-V) to handle all types of applications (optional, sold separately)
- Stand adjustable up to 45 degrees for angle drilling
- Available with mounting brackets and screws
- **Part #: DRE4-S**

Max Drilling Diameter	6"
Height	30"
Motor Mount	60mm
Drilling Angle	90-45 degrees
Weight (Stand Only)	21 lbs
Base Diameter L x W	15-1/2" x 9"
Anchor or Vacuum Base	Combination

FG7500
planetary grinder

The FG7500 7.5HP grinder is ideal for large residential and medium-sized commercial jobs. It features a planetary grinding system with 3 heads for maximum productivity on large scale jobs. The grinder is powered by a 7.5HP Siemens motor and features ergonomic handles for easy maneuverability. The FG7500 also includes a detachable water tank, adding flexibility for wet or dry grinding. Backed by our industry-leading 3 year/2,500 hour limited warranty.

• Part #: FG7500

Length	39.4"
Width	25"
Height	29.6"
Weight	680 lbs.
Motor Output	7.5 HP
Grinding Head Size	24"
# of Plates	3
Phases	1
Power	220V
# of Speeds	Variable w/ Soft Start

FG5000
planetary grinder

The FG5000 5HP grinder is ideal for medium residential and medium-sized commercial jobs. It features a planetary grinding system with 3 heads for maximum productivity on large scale jobs. The grinder is powered by a 5HP Siemens motor and features ergonomic handles for easy maneuverability. The FG5000 also includes a detachable water tank, adding flexibility for wet or dry grinding. Backed by our industry-leading 3 year/2,500 hour limited warranty.

• Part #: FG5000

Length	38"
Width	21"
Height	26.4"
Weight	454 lbs.
Motor Output	5 HP
Grinding Head Size	20"
# of Plates	3
Phases	1
Power	220V
# of Speeds	Variable w/ Soft Start

DC3300
dust extractor

To ensure a dust-free floor, the DC-3300 dust extractor is a powerful, highly efficient 2 stage vacuum system that collects all sizes of dust particles and prevents clogging by depositing large grit particles into the first canister and the small to medium grit particles in the main canister.

• Part #: DC3300

Width (smaller unit)	22"
Height (smaller unit)	39"
Width (larger unit)	27"
Height (larger unit)	49"
Weight (net)	182 lbs
Cubic Feet Per Minute(CFM)	330
Auto pulse or manual shake	manual
Power	110V / 50Hz 220V (optional)
HEPA	compatible

DV-GR-K
slurry vacuum

- 30 & 50 gallon capacities
- Model available with 4 casters or 2 casters with 2 large pneumatic wheels and a grab handle
- Available with or without drain plug
- 2" headed inlet tube
- Stainless steel screen float enclosure
- 1.5" Steel wand
- Roll cage protection for all components
- Recessed electrical plug, no more cord restraint
- Accessories & other tooling available
- **Part #: 30 Gallon Vacuum: DV-GR-K12**
55 Gallon Vacuum: DV-GR-K15

Motor	120 V 13.5 AMPS
Airflow	104 cfm
Hose	1.5" or 2" x 15'
Vacuum	110 vacuum inches water sealed
Tool	14" squeegee floor tool 6" aluminum utility tool

DC350LM
dust extractor

- Introducing our most powerful single-phase dust extractor. Three large, commercial-grade vacuum motors provide 330 CFM and 100" of water lift, which is plenty of power for small to mid-size floor grinders. The DC-350LM is equipped with a drop down dust collection system that has a separator built in to the bottom. The filters are HEPA. The DC-350LM is portable and easy to maneuver on job site floors. All steel construction with large wheels in back and small locking wheels in front. All accessories are included.
- **Part #: DC350LM**

Width	26"
Height	66"
Weight (net)	152 lbs.
Cubic Feet Per Minute(CFM)	330
Auto pulse or manual shake	manual
Power	110V / 50Hz 220V (optional)
HEPA	compatible

DC150LM
dust extractor

- Portable and powerful single phase HEPA dust collector with two motors.
- Connect directly to equipment for dustless grinding and sanding.
- Provides fast recovery of bulk dry dust and debris found on construction abatement and restoration jobs.
- Complies with all OSHA in table 1 requirements.
- **Part #: DC150LM**

Width	22"
Height	58"
Weight (net)	132 lbs.
Cubic Feet Per Minute(CFM)	224
Auto pulse or manual shake	manual
Power	110V / 50Hz 220V (optional)
HEPA	compatible

EG1000
edge grinder

The EG-1000 edge floor grinding machine is ergonomically designed and allows the user to grind in a upright position, helping to eliminate fatigue, backaches, and job site injuries. The most efficient edge grinder in the market. • Operates with 7" hand-held grinder (optional) • Safer operating • Easily connects to a vacuum system • Easy transportation • 45 lbs frame weight • Equipped with headlight for operation in dim areas • Heavy Duty body construction • Control and apply pressure to the center of the tool with guide handle • Easy grinding to the edge. Front arm has multiple position pin to get into tight areas.

• **Part #: EG1000**

Length	25"
Width	23.6"
Height	40.5"
Weight	53 lbs.
Grinding Head Size	7"

EG500
edge grinder

The EG500 is a kneel down edge grinder that is very maneuverable. It's easy one hand operation reduces back ache and shoulder pain. The shroud is designed to not lose suction at any angle even against a wall.

• **Part #: EG500**

Length	24"
Width	12"
Height	10"
Weight	30 lbs.
Grinding Head Size	7"

DV HAND GRINDER

7" Optional Grinder (DV Hand Grinder)
(Hand Grinder that attaches to frame)

The DV Hand Grinder is a quality hand-held grinder designed specifically for concrete prep and coatings removal. The heavy-duty design of the DV Hand Grinder provides solid performance when grinding for concrete preparation along walls, around protrusions, and those hard-to-access areas, and offers great dependability for removing epoxies and mastics when utilizing appropriate grinding disks and wheels.

• **Part #: DV-AGS-1000**

Grinding Width	7"
Production Capacity	150/200 sq.ft
Motor	6600 rpm
Voltage	120V, 1ø, 60 Hz
Amperage	15A
Power Cord	6 ft. (1.8m)
Dust Hose Connection	2"
Weight	Net 9 lbs
Dimensions	19" L x 4.5" W x 5" H without handle attached

**TROUBLE-
SHOOTING
POLICY
WARRANTY**

This troubleshooting guide may help identify, diagnose, resolve and prevent diamond blade problems. The following are samples of some of the problems you may encounter in the field along with potential causes and prevention guides to help diagnose and prevent future problems.

LOSS OF TENSION

- CAUSE Blade core has been overheated.
- PREVENTION Provide proper amount of water to both sides of blade. Check to make sure water pump is producing sufficient water flow and that no blockages exist in the water lines.
- CAUSE Blade core has been overheated as a result of the blade spinning on arbor.
- PREVENTION Securely clamp the blade by tightening the flange nut and make certain that the drive pin is functioning on concrete saws.
- CAUSE Blade core has been overheated because of blade core rubbing side of material being cut.
- PREVENTION Properly align saw to permit straight cutting. Avoid twisting the blade in cut. Make certain that shaft RPM is correct, so that blade is operating at its tensioned speed, and consequently runs perfectly straight.
- CAUSE Unequal pressure at blade clamping collars.
- PREVENTION Blade clamping collars should be identical in diameter and the recommended size.

DO NOT USE A BLADE THAT IS OUT OF TENSION!

CRACKS IN STEEL CORE

- CAUSE Blade flutters in cut as a result of loss of core tension.
- PREVENTION See "Loss of Tension" section.
- CAUSE Blade specification is too hard for material being cut.
- PREVENTION Use softer-bond blade to eliminate stresses which create cracks.

DO NOT USE A BLADE WITH A CRACKED CORE!

UNDERCUTTING

- CAUSE Abrading or wearing away of the steel center faster than the diamond segment. (Highly abrasive slurry is being generated during cutting.)
- PREVENTION Use as much water as possible to flush out slurry generated during cutting or use wear-retardant cores. CAUTION: Wear-retardant cores are not always the final answer to eliminating undercutting. Care must still be taken to provide sufficient water to the core area immediately adjacent to the segment. This is especially important when making deep cuts.

DO NOT USE A BLADE IF IT IS UNDERCUT!

BLADE WOBBLER

- CAUSE Blade mounted on defective saw.
- PREVENTION Check for bad bearings, bent shaft, or worn mounting arbor. Also, check collars to make sure they are clean, flat, and of the manufacturer's recommended diameter.
- CAUSE Blade being run at improper operating speed.
- PREVENTION Make certain that blade shaft is turning at the recommended RPM to match the tensioned speed of the blade. Use a tachometer on concrete and stone saws to make certain blade shaft is turning and set at the proper speed.
- CAUSE Blade collar diameters are not identical. (Uneven pressure is created on the blade blank at the center.)
- PREVENTION Use proper size blade collars.
- CAUSE Blade bent as a result of dropping or twisting.

DO NOT USE A BLADE THAT WOBBLER!

ARBOR HOLE OUT OF ROUND

- CAUSE Blade collar is not properly tightened, permitting blade to either rotate or vibrate on shaft.
- PREVENTION Wrench-tighten arbor nut to make certain blade is adequately secured to prevent rotation on arbor shaft.
- CAUSE Worn or dirty blade collars, which do not allow proper blade clamping.
- PREVENTION Clean blade collars, make sure they are not worn, and tighten arbor nut properly.
- CAUSE Blade not properly mounted.
- PREVENTION Make certain blade is mounted on the proper diameter of the shaft before tightening arbor nut on concrete saw, and make certain that pin holes slide over arbor drive pin. Never depend on drive pin to actually drive the blade. A drive pin is simply a safety measure to prevent the blade from spinning on its mounting arbor, should the nut come loose.

DO NOT USE A BLADE THAT IS OUT OF ROUND!

UNEVEN SEGMENT WEAR

- CAUSE Insufficient water, generally on one side of the blade, which reduces side clearance.
- PREVENTION Flush water system. Make certain that water is being adequately and equally distributed to both sides of the blade.
- CAUSE Equipment defect, which causes the blade to wear out of round.
- PREVENTION Replace bad bearings, worn arbor shaft, or misaligned shaft on the concrete saw, and make certain the engine runs smoothly to prevent harmonic vibrations, which in turn causes the blade to pound on a regular cycle basis.
- CAUSE Saw head misaligned.
- PREVENTION Check saw head alignment for squareness, both vertically and horizontally.

SEGMENT LOSS

- CAUSE** The material was not held firmly, which caused the blade to twist or jam in the cut, causing segment loss.
- PREVENTION** Material must be held firmly.
- CAUSE** Overheating due to inadequate supply of water or complete loss of water. This is usually accompanied by discolorations which appear on the steel center in the area of the segment loss.
- PREVENTION** Provide adequate water flow to both sides of the blade, look for line blockages on concrete saw that could cause complete loss of water as a result from equipment running over water feed hoses.
- CAUSE** On the concrete saw the steel center worn thin as a result of undercutting by abrasive slurry generated during cutting. (Core wears to a knife edge, which weakens the weld/braze and causes segment loss).
- PREVENTION** Use sufficient water to flush slurry out of cut. If generated, slurry are highly abrasive and wear-retardant cores / undercut protection should be used.
- CAUSE** Defective blade collars which cause the blade to flutter in the cut or fail to adequately support the blade in perfect alignment.
- PREVENTION** Clean foreign material from blade collar surfaces, or replace collars under manufacturer's recommended diameter.
- CAUSE** Blade is too hard for material being cut causing excessive dullness and the segment separates due to impact or fatigue. (This can also be the cause of frictional heat, which can melt the brazing solder.)
- PREVENTION** Use proper blade specification for the material being cut.
- CAUSE** Blade is cutting out of round resulting in a pounding impact.
- PREVENTION** Replace worn bearings, re-align blade shaft, or replace worn blade-mounting arbor.
- CAUSE** Improper blade tension which produces high pressure on the segments and subsequent failure of the brazed joint (weld).
- PREVENTION** Make sure running speed of the equipment is specified when ordering blades. The spindle speed should be checked with a tachometer to ensure that each diameter blade is running at the manufacturer's recommended cutting speed and blade-tensioned speed.

DO NOT USE A BLADE WITH A LOST SEGMENT!

SHORT LIFE

- CAUSE** Use of a soft-bonded blade for cutting abrasive material, or a cured concrete blade for cutting asphalt or green concrete. There are specific blades designed for each particular material to give the most economical cutting. Also avoid the use of general purpose specifications for cutting a single specific material. General purpose diamond blades are designed to cut a range of materials and, since it is unlikely the operator will be cutting proportionately the proper amount of both hard and soft materials at all times, this is not the economical method of cutting.
- PREVENTION** Use the proper blade specification, as recommended in this catalog.
- CAUSE** Inadequate water to the blade.
- PREVENTION** Make sure water hoses are clean and free from any blockages. Approximately two gallons of water per minute are required to properly cool a saw blade.
- CAUSE** Bad spindle bearings, worn mounting arbor, or misaligned shaft.
- PREVENTION** Replace defective parts.
- CAUSE** Loss of power, resulting from loose drive belts or improper voltage.
- PREVENTION** See instruction manual for proper belt tightening, replace worn belts, and make sure proper line voltage is being supplied to the motor.

CRACKS IN SEGMENT

- CAUSE** Blade is too hard for material being cut.
- PREVENTION** Use blade with softer bond.

DO NOT USE A BLADE WITH A CRACKED SEGMENT!

BLADE WILL NOT CUT

- CAUSE** Blade bond is too hard for material being cut. (Improper blade specification.)
- PREVENTION** Consult blade recommendation chart or manufacturer for the proper blade specification for the material being cut.
- CAUSE** Blade has become dull, probably as a result of being used on too hard a material.
- PREVENTION** Dress or sharpen with soft concrete block, piece of sandstone, or in asphalt to expose diamonds. If continual dressing is required, this would indicate that the blade specification is too hard for the material being cut.
- CAUSE** Failure to initially break in new blade on specific material being cut.
- PREVENTION** Allow blade to sharpen itself on the material to be cut when first placing it on the saw. This is the proper way to break in a blade.
- CAUSE** Insufficient power to permit blade to cut properly.
- PREVENTION** Tighten belts in accordance with machine maintenance instruction. Use correct voltage at motor and use adequate horsepower for cutting application.

SALES POLICY

- **Prices:** Subject to change without notice. Prices in effect at time of shipment are applicable. All prices are in U.S. dollars. Prices quoted are without federal, state or local taxes of any type.
- **Minimum Order:** \$400.00 (excluding freight and taxes)
- **Sales Tax:** Sales tax will be charged where applicable unless a current tax exemption certificate is provided.

FREIGHT POLICY

Diamond Tools

- **Orders over \$400.00 net are shipped standard ground FOB destination within the continental U.S., customers to pay freight on all orders less than \$400.00.**
- Requests for 3rd, 2nd, or next day shipments will be billed to the customer.

Equipment

- All pieces of equipment and parts are shipped by ground/truck with freight prepaid and added to the invoice.

TRIAL POLICY

- Purchase orders are requested and full payment is expected on all trial blades. Trial blades will be invoiced on the basis of normal ordering, if the trial blades are successful payment in full is expected.
- Trial blades that are unsatisfactory will be issued full or partial credit depending on the usage. The customer and the returns department will determine the efficiency of the trial performance

RETURNED GOODS POLICY

- All Returns are subject to a minimum 15% restocking fee.
- Discontinued items and items one (1) year or older from the original invoice date cannot be returned.
- The Customer Service Representative will issue a Return Goods Authorization (RGA) number for the return. Freight on returned merchandise must be paid by customer and merchandise must be in resalable condition.
- Customized and special order product cannot be returned.
- Only authorized shipments meeting the follow conditions will be accepted.
 1. RGA#
 2. Reasons for return
 3. Description of goods
 4. Copy of original invoices
- Special order items must be canceled within 30 days of ordering. Customer will be responsible for payment of special order after 30 days from order date.

TERMS & CONDITIONS

- 3%/15 days, Net 30 days
- **Past due amounts are subject to one percent (1%) per month late charge, where permitted by law.**

DIAMOND TOOL WARRANTY

- **Laser Welded Blade/Bit Warranty:** If the laser welded bond between the segment and the core or barrel fails during the normal useful life of the product*, the blade or bit will be replaced free of charge.
- **Brazed Blade/Bit Warranty:** If the brazed welded bond between the segment and the core or barrel fails within the first .050" of segment wear, the blade or bit will be repaired or replaced free of charge.
- **Continuous Rim Blade Warranty:** If the bond between the diamond rim and core fails during the normal useful life of the blade, the blade will be replaced free of charge.

These warranties do not cover abuse to or misapplication of the blade or bit. Our obligation under this warranty is limited to replacement or repair at our Irvine, California facility.

- **Equipment Warranty: Gas Powered Hand Held Saws and Core Drills 90 days, all other Equipment has a One Year Limited Warranty,** except FG7500 and FG5000, which are backed by our industry-leading 3 year/2,500 hour limited warranty.

Diamond Vantage will guarantee every machine we sell to be free from defects in material and workmanship. The obligation of Diamond Vantage under this warranty is limited to the repair or replacement of any parts which, under normal use, prove to be defective in material or workmanship. The parts involved or the unit in question should be returned to Diamond Vantage or to a point designated by us, transportation prepaid.

This warranty does not obligate us to bear the cost of labor or transportation charges in connection with replacement or repair of defective parts. Likewise, it shall NOT apply to any unit which has been subjected to misuse, neglect or accident. This warranty does NOT apply to any machine which has been repaired or altered outside our factory.

This warranty does NOT obligate Diamond Vantage, with respect to items such as engines, motors, hydraulics, etc., which are subject to their own guarantees and warranties provided by the manufacturer.

We shall in no event be liable for consequential damages or contingent liabilities arising out of failure of any equipment or parts associated therewith.

***For diamond blades, the above Diamond Tool Warranty is only applicable to blades up to 14" in diameter. For all blades over 14", this warranty is only applicable during the first 50% of segment wear.**
