## NEXT GENERATION SMALL DIAMETER BLADES

Diamond Vantage® implements the next generation sintering technology to a new line of small diameter blades.

In keeping with our commitment to continued advancement in diamond blade manufacturing technology, Diamond Vantage® is applying our most advanced sintering technology to improve the performance and value of our small diameter diamond blades.

We will make a running change and start shipping new products as the current product inventory is depleted.

This change will provide users with the following benefits:

- 20% faster cutting speed
- Better value at the same cost
- Able to cut harder materials than the previous generation.
